CANTA CRUZ, May 17.- [Exclusive Dispatch.] Boodle has triumphed over decency, and the California delegation to the National Democratic Convention is instructed to vote for the terrible "Yellow Kid." William R. Hearst.

The Committee on Resolutions returned a majority re position to instructing for any candidate, and for two hours a battle was waged on the floor of the convention in support of that report. Then a recess was taken, and during the intermission enough of the San Francisco delegation "were seen" by "Col. Mazuma" to turn the tide in favor of sending a "canned goods" delegation of the yellow brand to St. Louis.

The Hearst resolutions squeezed through by the narrowest of majorities, and the antis do not mince words in charging that boodle

again on a test of strength. A times
during this proceeding three and four
were talking at a time.
The order of business was then reported by the committee on that. It
followed in the main the usual order. REGULAR ROUGH HOUSE.

During this time a delegate, one of the roughest specimens from one of cisco, tried over and over again to get the floor. The chair called him to order, told him to sit down, and finally called for the sergeants at-arms 'to remove him. They put him down in his seat, but he kept bobbing up. Then, amid general confusion, the officers attempted to put him out. The convention was in an uproar all around the fracas, the gavel rapped, rapped and rapped as fast as Frank Goul, could make it rise and fall. He wanted to appeal to the officers not to put him out, but let him try to be still, but while he has a magnificent, and well-trained voice, it could not penetrate the din around the recalcitrant delegate. In the midst of the confusion a motion to take a recess cisco, tried over and over again to get confusion a motion to take a recess to 1 o'clock p.m. was carried by those in a condition to vote. The Bay City tough was three, four, a dozen seas over with genuine Democratic en-thusiasm of the 40-rod brand.

LOS ANGELES RUCTION Hearst is a member of that body exBefore the main convention had assembled the delegates from Los Angeles county were called to a caucus.
The purpose developed as a scheme
to bind the delegation to a unit rule
to indorse the terrible "Yellow Kid."

Hearst is a member of that body except by seeing his name on the rolls.
He is not big enough to make his
presence felt.

Shanahan of Shasta next came on
with a tremendous voice. He wanted
a President like Lincoln, and thought

(Continued on Fourth Page.)

The antis kicked hard and fast. M. W. Conkilis said:

"We know how this delegation stands. We will not consent to be bound by any unit rule. We have twenty votes in this delegation and all we will agree to is to give you thirty-five votes to vote as you please while se vote twenty."

John Ince was appointed teller and he assounced that not enough votes were reported to constitute a quorum. Petterson, the chairman, declared there would be a postponement until a quorum could be had. Milton K. Young mounted a chair and called the meeting again to order, quorum or no quorum, and as the county committeeman, he demanded that Petterson probaed. But here the Hearst sang met a little repulse all the same as Considers on the Yalu. It is queer how little such small matters as Supreme Court decisions and lack of quorums disturb the equanimity of the backers of "the only man on earth who stands for blazing righteousness and fair play to the meanest of God's creatures."

PLATFORM ADOPTED. It was \$2.30 o'clock before the Com-

PLATFORM ADOPTED. mittee on Platform and Resolutions was ready to report. The platform

Hearst to the National Convention as a real good little man who had done great things for suffering humanity. It was just a bit of taffy with a string tied to it so that Willie should not swallow it all at once and make him-

self sick.

The minority report favored a straight out indorsement of Hearst for President. Here began the real fight of the convention, the only real business before the assembled host. fight of the convention, the only real business before the assembled host. Faw of Alameda got the platform and made a point that in the past Tarpey had strenuously opposed in-structions to national delegates. Tar-pey got up and said this was mere newspaper talk, and claimed "he never said it.", Faw retorted that he was present and heard it and was quoting from the tablets of his mem-ory.

BIG VOICE, LITTLE BRAINS.

Next came Jones of Alameda, a Populist statesman, who had mercilessly inflicted himself on the convention until the members called him down. He promised "to be brief," and the convention went wild with applause. It was the first real enthusiasm of the week. The speaker has voice enough to fill a ten-acre field and ideas which could be put in a thimbie. He worked the Native Son racket again, the labor union business, Hearst's mother and other things. BIG VOICE, LITTLE BRAINS

business. Hearst's mother and other things.

Then came Farmsworth of Visalia, who opened up with a declaration that he proposed to support the party nominee whoever he be. And that was something Hearst had never done. He said the Democrats in Congress had not yet found out that Hearst is a member of that body except by seeing his name on the rolls. He is not big enough to make his presence felt.

he had that likeness in Willie. He seemed to find no Democratic President in the past for a model. Here the five or six delegates from Solano came into the hall with a big drum which they beat furiously to make out that there was real noise for Hearst.

Woodman, "who also ran" twice for State printer, tried so talk and said the Examiner betrayed Lane. "Livernash told him so."

MILT YOUNG HISSED.

The next infliction was Milton K. Young of Los Angeles. He said Los Angeles had been eight years without a Democratic paper until the "yellow" one came to its roidef. There were hisses all over the bouse as Young went on.

Holcomb of San Francisco came to the front with a confession that the Examinor had betrayed him when he ran for office. He santed to forget this. He said San Francisco was full of a labor-union party composed of men who were Democrats—if they could be raught to forget Hearst's paper.

Gleason of San Francisco arose to set forth his grief at hearing Hearst willfied in a Democratic convention. Hearst was the champion of union isbor. There was pieuty of applause for this.

for this.

BAH! SAYS BARRY.

With cheer after cheer James H
Barry of the San Francisco Star took
the platform. He held the proxy of the platform. He held the proxy of Ben Maddox of Visalia, who is another old-time fellow opposed to Hearst. Barry said Willie never showed "a bit of interest in labor of any kind until the political microbe attacked his brain and, then he organized a bogus labor-union party, headed by repudiated Republicans, and with this defeated the Democratic party whenever he could."

"Bah!" shouted Barry, "It makes me sick!"

J. A. Booty of Santa Ana and E.

tion cried loudly: "Question! Question."

Griffith of Alameda got the floor
and the convention concluded to
hear him. The main thing he acquitted himself of was a neat smile
to the effect that Raker should not.
"come down from Modoc with spurs
to throttle the convention."

The fact is the Hearst-fellows tried
to "throttle" Raker without spurs.
Griffith had much to say about
Hearst's mother and what she is doing—little of Willie and his doinga.

including an attack on the way the panam Canal concession was secured by the United States.

Then followed a resolution in favor of the Parceis Post plan which will tend to hirt the business of every small business man in the United States and to build up great department for the Presidency profit in his plans through the casting of illegal votes in the convention.

HEARST CROWD LOST.

Boyd, of San Bernardino, said it any one thought this a Hearst scheme he would withdraw his motion if his second would consented and many delegates thought the matter ended, but the Hearst comments of the matter ended, but the Hearst them the matter ended, but the Hearst will convent and practicing rigid economy. Well, the Democrats are very will at many of his hits will convented and many delegates thought the matter ended, but the Hearst will at many of his hits will at many of his hits and the convention will an event of the parameter of the way the panama Canal concession was secured by the United States.

The next thing is the plan of Loucks to be sent there from California, but submitted that a "canned" delegation would not be an edifying spectacle.

The platform was strong for cutting down the revenue and practicing rigid even my the platform way. The convention went will at many of his hits doing.

The platform and in an eloquent address pleaded that the delegates be sent untrammeled. He referred to the fair at St. Louis and the canned to be submitted that a "canned" delegation would not be an edifying spectacle.

The platform was strong for cutting down the revenue and practicing rigid economy. Well, the Democrats are used to doing things without money.

BONE OF CONTENTION.
Then came the great bone of contention, in a resolution to recommend Hearst to the National Convention as

Gould seemed deaf. There were cries of "roll call" again until Tarpey asked for a hearing for all.

ALFORD WAS FRANK.

W. H. Alford mounted the platform and made a very eloquent and telling Hearst speech. He was forced by the candor becoming a gentleman to begin by confessing that Hearst's paper defeated Lane. He asked if Hearst's papers were not a powerful factor to have with the candidates in the campaigm next fall. This of course, carried the intimation that the "longest least wire" would be is the knocking unless Hearst headed the ticket. The delegates all over the hall shouted "No!" They did not want the Hearst papers with them.

"Will you arraign his papers?" cried the speaker.

"Yes, yes," yelled the delegates. Alford then told how Willie had put up dough to do politics for the party.

GEARY'S FINE POINT.

T. J. Geary closed the debate and said the Democratic party stood for principle, not patronage, and that he did not want the party manhood sold for Hearst's patronage. He said they had been for eight years trading their principles for Populist patronage and had lost by the bargain. Mr. Geary made a fine point when he said: "Mr. Hearst is not a citizen of California. If he ever gets before the national convention he must go there as a citizen-of New York, and the Empire State had said that the Democracy there want no Hearst in theirs. Now, will you serve notice on New York that you will not have the citizen of that State who has the indorsement of that State, but that you propose to force on the Democracy there want no Hearst in theirs. Now, will you serve notice on New York that you will not have the citizen of that State who has the indorsement of that State, but that you propose to force on the Democratic of that State one of their citizens whom they have said they will not have?"

As Mr. Geary came from the platform, Hutchison was again waving

Blockade of Vladivostok Denied by Russian Admiralty—Japanese Ap-pearing in Northwestern Manchu-ria to Hamper Kouropatkin's Re-trest Northward—Roads Very Bad.

ST. Whatever Skrydioff's future plans may be, the admiralty says he will sectionly proceed to Viadioscopy and may be, the admiralty says he will certainly proceed to Viadivostok and inspect the squadron there. The report that Viadivostok is blockaded is denied at the admiralty. Telegrams received from Rear-Admiral Jessen do not refer to the presence of a single Japanese ship. It is said that the Russians would not have the slightest objection to the blockade of Viadivostok, since it would tie up a Japanese squadron without causing inconventence, it being Admiral Skrydloff's plan not to risk either of the Russian squadrons until the Baltic squadron reaches the Pacific.

In the absence of advices, the General Staff is continuing its speculation made on the litest reports of the appearance of combinerable fodies of the memy in the northwest section of Manchuria. It is believed here that the Japanese generals must appreciate that they would lose the fruits of their achievement if Kouropatkin retired unmolested to Harbin, there to await reinforcements, leaving the invaders to hold the country and thereby losing men by disease. The Japanese course would have good grospects of success if they had sufficient strength. But the enemy is too weak to carry it out. As further showing that Kouropatkin never had any intention to attempt to stop the northward advance of the Japanese, a railroad engineer who has just arrived from the Far East was quoted today as asying that when he talked with the Commander-in-Chief in Pobroary the latter wanted an additional line built in the rear of the Manchurian army, so as to enable it to fall back and subsequently advance. The engineer added:

"Kouropatkin said he hoped to advance at the end of June, or in case the rains interfered, at the end of August. I pointed out that he had better go slow and make a survey, to which Kouropatkin replied: "Build immediately. There, is no time for a survey. Otherwise the whole territory will be in the enemy's hands."

Staff show that the Japanese are practically masters of all the southern end of the Liao Tung Peninsula, Port Arthur and the territory compromptly brought about, is due to opposition of any consequence to the Japanese advances. A member of the General Staff said to the Associated Press that the removal of the guns from the fortifications erected at Kin Chau and the destruction of Port Dainy were primarily for the purpose of concentrating the entire Rus-sian force at Port Arthur.

sian force at Port Arthur.

The weakness of the Manchurian army, said this officer, left only one course to pursue, namely that of mobilizing sufficient troops at Port Arthur to hold it until relief came, abandoning every point outside which did not contribute to the straetgic defense of the fortress. It has been learned that the ground over which the Japanese must charge to capture the fortress is heavily mined. It they do capture it, the officer said, they will pay a frightful price. they will pay a frightful price.

LONDON SIFTINGS. [BY THE ASSOCIATED PRESS-P.M.] LONDON, May 18.—No further news has reached London throwing light upon the appearance of Japanese troops northeast of Mukden or indicating by what route they reached that point so unexpectedly. The Japanese are so successful in hiding their nents that it is only possible to guess at them from the vague indica-tions in Russian official dispatches.

According to the Standard's Tien-Tsin correspondent, Gen Kouropatkin has left for Harbin, Viceroy Alexieff still being at Liao Yang with 20,000

It is noticeable that Russian official dispatches seldom name the place whence they are sent. A question greatly discussed in the

London papers this morning is whether Gen. Kouropatkin has suc-ceded in ascertaining that the Japa-nese are threatenig his rear, so near the Mukden line and has been enabled to begin a retreat, or whether he has decided to fight. In any case it is considered that any day may bring news of a great battle in this district. news of a great battle in this district, as the transport difficulties are believed to be so great as to make it almost impossible for Gen. Kouropatkin to effect a rapid retirement. Indefinite reports continue to reach London of Japanese bombardments of Port Arthur and Dainy.

LABOR. **CLOSED SHOP** 

CONDEMNED. Against Public Policy and of

Doubtful Legality.

The Liberty of the Individual Must be Preserved.

President Parry Discusses the Labor Problem.

The closed shop is against public policy and is of doubtful legality. The liberty of the individual would be impossible if he is debarred from the right to contract for his services because he does not belong to a union. I believe that this truth will become generally recognized and that the day must come when no industry will be allowed to run on the closed shop plan. Any set of men have a right to contract in a collective capacity for the sale of their labor, but they cannot be upheld in makother labor from the right to contract.-[Extract from annual address of President D. M. Parry of National Association of Manufacturers, delivered at Pittsburgh, Pa., yesterday.

PITTSBURGH (Pa.) May 17.-Nearly called to order today. At the conclu-sion of of the welcoming speeches President D. M. Parry of Indianapo-lis delivered his annual address. MR. PARRY'S ADDRESS.

Mr. Parry briefly discussed the labor problem, which he declared was at problem, which he declared was at present the paramount question before the association. In reviewing the labor events of the past year he said:

"The theory that the condition of labor can be bettered by checking production and making life and property insecure was put to an extensive test and the results were disappointing to those who believe in that theory. There are many indications which go to show that organized labor is learning a very valuable lesson in economics and law observance, and hopes can be reasonably entertained that the strikes which have characterized the last year will be less strenuous in the immediate future."

"The manufacturers and employers of not desire this strife, and labor strife, which he declared, to be a national calamity, he said:

"The manufacturers and employers of not desire this strife, and labor strife, and labor strife, and labor strife, and labor does not desire this strife, and labor desire this strife, and labor does not desire this strife, and labor desire this strife, and labor does not desire this strife, and labor does not desire this strife, and labor does not desire this s

American citizen if he did yield that right.

NO REDUCTION OF WAGES.

"It is also absurd to charge the manufacturers and employers with combining for the purpose of reducing wages and otherwise oppressing their employés. Of all the associations of employers in this country I know of not a single one that has for its object the oppressing of the employé. There has not been any concerted effort to force a reduction of wages and I do not believe there will ever be such an effort. There are some associations of employers, particularly among the trade associations, that are centinually struggling against exorbitant demands of the unions, but these associations are constantly on the defensive and their efforts to retain some fair share of the profits in their business are not to be construed as efforts to oppress their labor.

"In regard to the National Association of Manufacturers I am positive that any crusade having for its object the grinding down of labor would meet with the determined opposition of practically the entire membership. The policy of this association is primarily one of peace. If we stand for anything we stand for the development of American industry. It is obvious that men will heafitate to invest their capital in productive enterprises if it means constant struggle with labor unions and if frequent strikes tend to destroy trade by making uncertain the filling of contracts. Industrial strife adds a hazard to investments involving the employment, of labor which cannot fail to be injurious to industrial development, thus causing permanent loss to all classes. Therefore our policy is one which looks to the adoption of measures that will arouse hostilities."

Mr. Parry then declared that high wages were a blessing and not a curse. He said that all employers would prefer seeing their men highly paid to seeing them struggling for a mere livelihood. But he said it was loolish to blame the employer permanent loss to all classes. Therefore our policy is one which looks to the adoption of measures that will right.
NO REDUCTION OF WAGES.

HOW TO RAISE WAGES. Mr. Parry then declared that the only Mr. Parry then declared that the only way to raise wages is to increase the per capita production. He said that men really worked for commodities and that since all commodities which supply the wants and desires of daily life must be distributed, if hot for one price, then for another, then it followed that the greater the amount of such commodities. The commodities was a wealtly product. Hence the need for industrial schools.

ST. LOUIS, May 17. When the first session of the biennial meeting of the General Federation of Women's Clubs began today delegates from all parts of the country, numbering 2000, were present. The most prominent subject of discussion is the question as to who will be the next president. At least a dozen names have been mentioned.

One of the subjects considered to day was proposed amendments to the constitution.

ST. LOUIS, May 17.—At the International Good Roads Convention to day, the principal speaker was Gen. Nelson A. Miles. Gen. Miles declared himself to be thoroughly in sympathy, with the movement for better roads, and in his address recommended that 5000 men in the army be used in times of peace as an engineding corps to locate the best and most feasible roads and cooperate with the surveyors of the various States.

He said that the government would be vastly benefited by such a plan when it became necessary to use such roads. The preliminary work of surveying could be done by the army, he said, and the work then left to the State to be carried to completion and the army to have control.

greater the real wages of men will become. Continuing he said:

How to increase the per capita production is therefore the first and greatest question of civilization. The pandoca of organized labor to create wealth by flat is chaldlike in its absurdity. No get-rich-quick schemes will emanelpate mankind from drudgery. The principal way to increase real wages is to increase the amount of machinery, that is the amount of productive capital. Who owns this productive capital is really quite immaterial. The material point is that it be increased, and no system could be devised that will more surely result in its being increased than that of individual ownership. Another way to increase the per capita production is through education and training of the individual to the end that he may become more efficient as a westlut producer. Hence the need for industrial schools.

Mr. Parry went into some detail as to the work accomplished by the association during the year, and made a special point of the fact that largely due to the work of the association neither the eight-hour or the anti-injunction bills were reported out by

"ANTI" FORCES ROUTED.

Then, when the receas was over, the surprise of the week came. Wise men day by day had said Hearst will win in the end. "The plan is to make the Hearst people open up and they will do it." As the delegates siled out the San Francisco Evening Post came in with the ink on it still "green" and big type three inches high staring one in the face, spelling. "Boodie." The Targsy people had said that the loss of the chairmanship was the loss of the battle. They ontered into a bar gain with the antis to get the "recommend" in the report, with a promise they would be satisfied. The minority report was to be voted down and the recommend adopted. HEARST BOODLE DID IT.

A sorry, routed and disgusted crowd were the antis. But men not in the convention, who had been hanging about the hotels, had said confidently all the week that no matter how things seemed to go, at the end the thing would be done. The word was passed around that the mischlef had been done during the last recess. Anyone who knows the San Francisco patriot who attends political conventions for "the good of the party" can guess how much "trouble it would cost" to change thirty of them.

Dockweller charges directly the use of Col. Maxuma's influence at the last moment. He sat by a delegate and said openly: "This man was offered money," and the man did not contradict the statement. Of the Los Angeles delegates who voted for Gould, seven forsook Dockweller at the last. He said on the foor that he knew four of these were bought.

During the forencon and a portion of the afternoon the head-quarters of the Committee on Platform and Resolution was a scene of fighting and the forencon was spent in reaching a decision on a declaration of principles.

There was some unexpected delay on the tariff plank. The one presented by the subcommittee to the main committee was thought by some to savor too much of Republicanism, and substitutes were proposed. The matter was finally settled by a rereferring of the plank to the subcommittee who agreed upon a plank satisfactory to the convention.

The contest of the convention began at the afternoon session when the subcommittee of five to whom had been referred the resolutions regarding instructions and non-instructions of the national delegates made a report to the general committee. A majority of the committee disregarded the resolution calling for instruction and favored those asking for non-instructions. A sonewhat long and heated debate foi-

As a matter of State pride he thought the delegation should be instructed for Hearst.

Finlayson of Los Angeles said, granting that Hearst was all his ardent admirers claimed he was, he still opposed instructing the delegates because the Democratic convention would be greater than any individual in it.

# CELESTE IS COMING BACK.

Declares Her Mother is but Another Shylock.

Will Fight for Her Rights in the Courts.

Mrs. Stull Not 'Alarmed by the Girl's Talk.

Puriously denouncing her own mother as a brutal person, a sordid Shylock, a designing fraud, Miss Ce-leste Schiedt is about to return to Los Angeles, from which she "mysteriously disappeared."

Angeles, from which she "mysteriously disappeared."

She is the daughter of Mrs. Gertrude Stull, who has been dilling the papers with rubbish to the effect that her daughter has been carried away by a mysterious gang of bogus-check men or fake Spanish noblemen, who are holding her for ransom.

Angered by these stories and her mother's conduct, Miss Celeste telegraphed yesterday to her attorneys that she is willing to come back to Los Angeles if necessary. Her attorneys immediately telegraphed, "Necessary." She will arrive here in a day or two. In the following letter, written to The Times from her retirement in Oakland, the girl peels the cuticle from her fond and loving mamma:

THE GIRL'S LETTER.

OARLAND (Cal.) May 16 .- [To the

THE GIRL'S LETTER.

OAKLAND (Cal.) May 16.—[To the Editor of The Los Angeles Times:]
Will you kindly gublish through the columns of your worthy paper my absolute denial of all the statements made by Mrs. Gertrude Stull [her own mother] in regard to me.

I have not run away, neither am I held for ransom, as the papers state. I am of age and left Los Angeles of my own free will to make a visit in the north, and can see no reason for all these stories about me.

Mrs. Gertrude Stull and I have not been on friendly terms for the last year, as the people of Los Angeles know.

My reason for leaving her, when I became of age, was on account of her cruel treatment of me, as many of my friends can testify.

My father, when he died, left me a sun of money and she has been trying ever since to secure it for herself.
While living with her she habitually beat me, in order to make me sign papers of whose contents I knew nothing.

Last summer she came to the place where I was staying with a paper, which she wished me to sign. It was a deed to my property, known as No. 785 Burlington avenue, which is now in the courts.

I refused to sign it and she beat my head against the wall, until I became hysterical and fainted. The people where I was living (Hjelm, my name) had to forcibly tear her from me.

The next day she made threats to kill me. In the end she made me sign away my title to said property. From that time on I have been in mortal fear of her.

I am not with a band of counterfeiters nor with spurious-check men, non-have I ever met any of the Spanish nobility, bogus or otherwise, but now and always have been here of my own free will to enjoy myself and make my own living until such time as the courts have settled my affairs so that I can have some support from it.

courts have settled my affairs so that I can have some support from it. I am not in hiding, but am on the streets during the day and at night I often attend places of amusements. Mrs. Stull knows that if she has mewithin her reach she would endeavor to defraud me of my just inheritance and that is why she has created all this unmotherly controversy. She is Shylock, resurrected, and her only god is money, not for the good it can do her, but just to see it and love it.

She cares nothing for me and has not

can do her, but just to see it and love it.

She cares nothing for me and has not for the last six or seven years.

She has not helped me since I came of age in giving me a roof over my head or in any other way provided for me. I have been working in that city and also in Avalon for my daily bread and the room I lived in since last October. Before that I had lived on the money which she turned over to me when I became of age Thee is still a balance of over \$4000 due me of my properties, and she has several times made the stitument that she will never give it to me.

Yours most respectfully,

WHAT MOTHER SAYS.

Mrs. Stull is not scared out, however, by the prospect of her daughter's return. She is a woman who discharges her lawyers at the last moment and tries her own suits.

When she heard of the charges that were huried out of her daughter's place of concealment, she telephoned fifteen or sixteen times in the course of the day to the office of her daughter's lawyer. She demanded to know the location of her daughter's hiding place.

place.

Mrs. Stull claims that her daughter has been turned against her by designing lawyers, who have spirited her away to prevent her giving testimony in the case in which Mrs. Stull says an attempt is being made to cheat her out of her rights.

SOUVENIR BNQUET.

One of the pleasing incidents of the convention of Locomotive Engineers in this city is the appearance of a souvenir book of Southern California getten out by R. C. Martin, secretary of the local committee of Arrangements. It is a profusely illustrated book of niney-five pages and gives fine pictures of all the principal points of interest in Southern California and some in Yellowstone Park. Rediands, Los Angeles, Riverside, San Diego, Pasadena, the local beaches and Yosemite Valley receive their due share of attention, and there is much descriptive matter in the book, telling of the resources of California. Altogether it is a handsome souvenir of the visit of the engineers.

Epok Concerns was launched by the Book Committee a few months ago, a remarkable division of sentiment was apparent throughout the church. The first draft of the plan submitted through the church press was rather immature. Was put out largely to test the drift of opinion. It was recalled, medified, enlarged, and then placed before the ministry and membership in a very complete and commanding form. B. T. Miller of Checinnati, a tusiness man of large experience and sagacity, land thoroughly versed in all the affairs of the Book Concern, was chairman of the committee that worked out the plan. Los Angeles had an able representative in the person of Dr. George F. Bovard.

Their report was adopted by the Book Committee by a large majority. The small minority worked out under the special guidance of E. B. Tuttle of Brooklyn, a report which they submitted at the opening of the conference. A note of warning had been issued by the ministry a month before General Conference, il medit: "Delegates, do not decide this question upon the basis of the facts submitted by the majority. Wait till you hear from us. When we get to Los Angeles we will not give the consolidation party an inch of ground to stand on."

The grauntlet was thrown down, and

"I hope nothing will be said that will make this company out to be anything that it is not. It is simply a lot of Chinamen who wish to learn military drill, as a similar number of white young men might do. It is merely the spirit of war that is among them.

"Some of the Chinamen came to me a while ago, and asked my assistance in getting up a military company. If sound Capt. West for them, and helped them organize the company." Actually that is all there is to it." Gen. Lea was asked regarding a rumor to the effect that he has been offering commissions to National Guardsmen to go into the service of the Chinese Emperor.

"A ridiculous story." he said, with annoyance. "If I wished to do so, I could not do that. I have no authority of the commissions. I am still waiting, as I have been, for orders from the Chinese Emperor. If he is restored to his throne, I do not know what I might do."

General Manager A. G. Wells has offered \$100 reward for the capture of the thurs, and now has his dander up. "We flave tried to tote fair with them all the way through," he said yesterday to a Times man, "but if they resort to violence the law will be screwed down on them. They have absolutely nobody to blame but themselves. They may throw up their jobs if they are not satisfied, but when it comes to using brass knuckles on our peaceful employes they will get into trouble. We received reports today from Winslow that the shops under non-union equipment are giving better service than ever before, and with fewer men. We are content with matters as they stand, if the strikers will simply pass on and mind their own business."

Webster was taken to the hospital, but is in a badly bruised condition, and one blow from the knuckles made a hole in his head. # TIMES SCHOLARSHIP CONTEST, 1904.

Grand Opportunity for Boys and Girls of Southern California and Arizona to Provide for Next Year's Schooling During the Summer Vacation-More Attractive Offer Than Ever for Ambitious Youngsters Striving for Educational Honors.

N accordance with its time-honored custom and the demands of the ambitious youth of Southern California and Arisona, THE TIMES will soon inaugurate another Scholarship Contest to run during the midsummer vacation. This contest will be conducted on lines similar to the contests of the last few years, which proved of such great benefit to the young people who participated. There will be some innovations, however, calculated to make it more attractive to all concerned than any of its predecessors. The details are now being worked out and will be announced

The prizes will be as rich and varied as last year. There will be free scholarships in all the leading educational institutions of the Southwest, supplemented by cash premiums that will make them well worth striving for

The dozens of boys and girls who have been benefited by for mer contests, can attest that THE TIMES has more than fulfilled its obligations to the prize-winners, and the liberal policy heretofore pursued will be continued. Intending contestants should bear in mind, however, that THE TIMES expects some service as a condition on which the prizes will be distributed. The competitors must for the time being become workers for this journal.

They must help to increase the circulation of THE TIMES. This will be easy

Everybody wants to read a good, live, daily newspaper during Presidential campaign. This summer's campaign will be unusually interesting, and THE TIMES will give the fullest and most reliable reports. Then there is the great war in the Far East, which interests everybody, and which will be fully described day by day in THE TIMES. The St. Louis Exposition and all other matters of current general and local news will also be reported faithfully and ably by THE TIMES in the future as in the past. All these considerations will make the work of the scholarship contestants pleasant and easy.

The contest will be open to all boys and girls of school age, in the grammer school or higher grades, who can give satisfactory references as to character. All who wish to compete should send in their applications at once to the Scholarship Manager.
A number of applications are already on file. Complete instructions will be forwarded to all applicants before the contest opens.

## BEWARE OF IMITATORS.

The success of THE TIMES Scholarship Contests may cause me newspapers lacking in originality of enterprise to attempt to imitate THE TIMES plan. Boys and girls who are wise will avoid the imitators and enter the contest conducted by the journal that has an established reputation for fair dealing and suc-

Messrs. W. R. Pierce, A. E. Merrill, C. E. York and several other Los Angeles men control the Fairview company, owning a group of chims near the E. M. Hamilton mine at Rosamond, in the Antelope Valley. A considerable amount of development work has been done on the property, which is now in a fair way to become a good producer. The ore averages about 330 jper ton.

Los Angeles parties headed by Randall and Gorden have just closed a deal for the purchase of the Ruby and Jurymines near Centerville in Shasia county. These properties have been worked intermittently for years, but the purchasers intend to systematically develop both the ledges and placers on the ground.

Five ribbon seams carrying large quantities of free gold have been opened up and a ledge carrying values ranging from \$2\$ to \$60\$ per ton in gold will be fully exploited. The placer ground is said to average about 3 cents per pan, and can be worked advantageously.

The stamps in the two mills of the Nevada-Keystone Mining Company have begun dropping again, and the first brick of the year will be turned out tomorrow. This brick is expected to be worth between \$5000 and \$6000.

The prospects are that the city will be in a financial position July 1 to pay all bills, a thing, that has not happened for twenty years.

Attachés of the Way Department have warned the Council Bridge Committee that work must cease on the outfall sewer pier until a permit has been granted by the Secretary of War. The City Attorney's office is working on an ordinance to prohibit killing and dressing poultry for the market outside regular slaughter houses.

given for the added expense in the City Engineer's office. So much street work has been done, so many official grades have been established, and so many preliminary surveys made that an extra large force of men has been, a stern hacksaity. The City-Engineer's office, however, is one of the least expensive branches of the city government, considering the number of skilled workmen employed. Most of the work done in the office is charged directly to property hoiders for street improvements, and thus much of the expense of the department comes back in revenue. Last year the gross expense of the department was \$74,337.47. The amount received in fees was \$23,577.

Although compelled by the unprecedented increase in improvements in city property to make out an almost complete set of field books. City Assessor Wismer has so managed his department as to keep it well within the appropriation made a year ago. Unless expenses for the next six weeks attendant on completing the annual measurement prove exceptionally heavy the City-Auditor's department will finish the fiscal year inside the budget estimate.

estimate.

New engine-houses, necessitating the employment of more than two score firemen, have proved the stumbling block to economy in the fire department. Chief Strohm's economical administration has done much toward reducing expenses, but the new men had to be paid, more horses were there to be fed, and the budget estimate suffered accordingly.

paid, more horses were there to be fed, and the budget estimate suffered accordingly.

Strict economy practiced by the heads of departments in the City Clerk's, City Tax Collector's and City Auditor's and City Teasurer's offices has kept these four departments well within the expense limits of the annual budget. Employment of assistants in the Building Superintendent's office, occasioned by great building activity, caused that department to break bounds, but as there was a corresponding increase in department revenue the office has proved to be self-supporting and the general fund has not suffered.

The park department will be about \$4000 to the good at the end of the fiscal year. For next year, however, the park beard hopes for a considerably larger appropriation than the \$99,000 allowed the department last year. Sycamore Grove and Summerland Park will have to be provided for this year, and axiensive improvements have been planned for Elysian, Echo and Griffith parks.

that they were violating the Federal laws by ordering the construction of a pier into the ocean at the mouth of the outfall sewer without first obtaining a permit from the Secretary of War. Four months ago the Council let 4 contract to J. D. Mercereau to construct a pier 1300 feet into the ocean to carry the sewage beyond the breakers. The work has been about half-completed, but it must stop until the city files application, accompanied by three drawings of the proposed pier with the Secretary of War and gets a permit to continue the work. The Federal law requires that a permit must be obtained before a wharf or pier of any kind can be builded out into the ocean.

To protect barn-yard and back-yard poultry within the limits of Los Angeles from indiscriminate killing is the object of a new ordinance being Drawn in the City Attorney's office. It is intended to provide, how, when and where barn-yard homicide shall be permitted.

For months communications have been piling up in the City Health Office, complaining of the nuisance that is caused by the indiscriminate slaughter of poultry in the residence sections of the city. These complaints recite that many poultry dealers and commission merchants have small stores downtown and keep their livestock in the back yards wherever they live. A number of these backyards are in locations in the Third and Fourth Wards, that but for them would be habitable. The complaints recits that in many cases the fowls are killed on the premises and the offal is thrown out and left to putrify and fester on vacant lets, all of which is said to be highly injurious to the health of the residents of the neighborhood.

Attempts have been made by the health inspectors to abate the nuisance but they were blocked by the absence of a seecific ordinance covering the mooted point. Now the Atiorney's office is drawing one that will surround the slaughter of poultry with the same regulations as those restricting the slaughter of cattle and hogs.

CEREAL FOODS. So great a buisance has the cereal business become in the past year, that conventions have been called in order that the grocers of the country could find a means of ridding themselves of the pest. But all to no purpose. The sustre cereal food salesman goes merrily on, forcing the grocer to take his goods until the shelves groan with cereals in cartons as glaring as a Dutch poster.

The upshot of it all will be the sending of one member of the Retail Grocers' Association to the Legislature with the fixed intention of making a bill to suppress the introduction of another cereal under penalty of instant death.

Stockton. Heavy receipts looked for today.

Some gooseberries came in yesterday, although the stock is small and immature. The boxes brought \$1 and sold very slowly at that.

It is stated by well informed parties that strictly local ranch eggs cannot be bought for less tran 25 cents, as they cost close to 22 cents. It is claimed the usual distinction between northern eggs and local ranch is disregarded by any one offering eggs at 22 cents. In fact the offerings would be, eggs worth 19631 cents, for 22 cents.

Northern red onlons are being quoted and shipments may soon come in regularly. No change in silver skins. Quality might be better.

Small fish are much in demand, with the usual oversupply of rock cod, halibut and mackerel.

Potatoes steadier in the north and firm here for first-class stock. Northern shippers are asking more than local jobbers are willing to pay, and trading is nominal.

Heavy receipts of berries came in yesterday. The wholesale price ranges from 3 to 5 cents. Fancy stocks go easily, with desultory trading in common.

EVANGELISTIC SERVICES.
The Temple Baptist Church was again crowded to its utmost capacity for the afternoon service commencing at 3 o'clock and lasting until some time after 5. There was excellent singing and many requests were sent in for prayers.
Mrs. Amanda Smith, the colored evangelist, whose fame is world-wide, was present and made a touching address. The sermon was by the Rev. L. B. Bates, D.D., of Boston, Mass. It was one of remarkable clearness, sweetness and power. The congregation was greatly moved and several unconverted persons sought the altar. The meeting will be continued every day this week at the usual hour, 3:30 p.m. The public is cordially invited to be present.

FOR METHODISTS' VISIT.

TITLE SCRAP AGAIN.

The question of beach title bobbed up again in the City Council last night, when Henry P. Barbour agked that body not to delay approving the map of Ocean Pier tract. He said a title and trust company, after strong advice, had guaranteed the title and the delay of the city is costing Long Beach thousands of dollars. On the City Attorney's advice, action was deferred two weeks.

MEMORIAL DAY.

MEMORIAL DAY.

Memorial Day will be observed as a general holiday in Long Beach, and exercises will be held in the City Park. The principal address will be by one of the veteran preachers of the General Conference. The school children will take part in the parade and exercises, and also participate in the beautiful ceremony of strewing the waves in memory of the salior dead. On the day preceding Sunday services will be held at the Methodist Church, when the old veterans, their wives and daughters will be addressed by some of the visiting conference delegates.

The most picturesque figure in the parade was the "Prophet of the Sierra Madre Mountains," who had ridden a snow-white horse down from the heights that tower above the foothill town to honor, us with his presence and crown the young Queen of the May with garlands of flowers. This ceremony included a May-pole dance, which took place in the park, and was witnessed by a large crowd. The prophet made an eloquent address, touching on the bistory of the San Gabriel Vailey from the prehistoric ages down to the present day.

CHURCH PROPERTY FOR BANK. [SPECIAL CORRESPONDENCE OF THE TIMES.]

SAN DIEGO, May 17.—Presiding Elder Sterling came from Los Angeles last evening to preside at a special meeting of the quarterly conference of the First Methodist Episcopal Church, a controversy having arisen about the sale of the church property for \$90,000, those most interested in the deal being Los Angeles men, who intend establishing a national bank here. There was much argument pro and con in the meeting. Three committees were appointed, one to canvass the congregation for funds for the purchase of a lot for a new church, another to investigate sites, and the third on church law governing such cases, the latter consisting of Mr. Sterling and the pastor, Rev. E. J. Inwood. If the reports of the committees are favorable, it is likely the deal will go through. CHURCH PROPERTY FOR BANK

Amazing Injury to Workman in Screen Factory.

The Wonderful Part of It Is He Will Recover.

A horrible, blood-bespattered spectadle of a man with a stick of wood glabbed clear through his nack, entering his throat just under his chin sind coming out the back of his nack, was brought to the Receiving Hospital yesterday.

His name is August Raffi, an employed at the Adams Screen Factory, where he was hurt yesterday in this frightight manner.

While working at a circular saw someone blundered and a big splinter, as most a foot long and as thick as a finger was torn off and projected through the butt of the stick was left is a bloody wound in the lad's throat, while several inches stuck out behind through the back of his neck. At the same time three other splinters of somewhat smaller but still formidable size, were shot through his neck. Raffi, who is not much more than a boy in years, was brought to the Receiving Hospital in a delivery wagon, and a pluckier boy never laid on the operating table.

Love, New York City, former Professor of Clinical Medicine and Diseases of Children, College of Physicians and Surgeons and in Marion Sims College of Medicine, St. Louis, Vice President of American Medical Association, 1895, etc., in an article in Medical Mirror, Pebruary, 1901, 1901; "While being the most effective of the natural mineral waters, it is strikingly superior to emergency solutions of lithia tablets and pure water, even where the said solution is an exceedingly strong one."

water, even where the said solution is an exceedingly strong one."

Dr. P. B. Barringer, Chairman of Faculty and Professor of Physiology, University of Virginia, Charlotteville, Va., writes: "In more than twenty years' practice, I have used lithia as an Anti-uric Acid agent many times, and have tried it in a great variety of forms, both in the natural waters and in tablets. As the results of this experience, I have no hesitation in stating that for the prompt results, I BUFFALO LITHIA WATER in preventing Uric Acid deposits in the body."

Dr. J. Allison Hodges, Richmond, Va., President University College of Medicine, and Professor of Nervous and Mental Diseases: "In Albumburla of Pregnancy, this water is one of the very best alkaline diuretics, and, with milk diet, is one of my sheet anchors."

Dr. Jos. Hott, of New Orleans, Ex. President

Dr. Jos. Hott, of New Orleans, Ex-President of the State Board of Health, of Louissans, BUFFALO LITHIA WATER in affections mays: "I have prescribed mere and urinary passages, particularly in Gouty subjects, in Albuminuria, and in irritable condition of the Bladder and Urethra in females. Thos. B. Clark 10 SOUTH REPAIL THE Stems 1884, Street Life. sensation throughout the city, McAdoo and Jerome declare they will abate the poolroom evil if they have to indict every director of the telegraph company. It is known that a number of Western Union directors have taken a personal stand against furnishing any more racing news. Among these are Schiff, Depew and Sage.

President Clowry declares he acted this afternoon on his own initiative. When asked if the service would be cut off all over the country, he said that was another question, and not under consideration at this time.

INTO JEROME'S TRAP.

There are over three hundred poolrooms doing business in New York
City, and the press has shown by
figures that the Western Union has
been drawing down something like
\$6.00.00, yearly for poolroom service in
New York City alone. After DittAtty. Jerome succeeded recently in
passing the anti-gambling law compelling witnesses to testify against gambling houses, he laid a trap to prove
the complicity of the telegraph company with the popirooms. Acting in
conjunction with Capt. F. Norton
Goddard, superintendent of the Antipolicy Society, Jerome succeeded in
making a contract with the Western
Union people to place wires in a certain room and furnish racing information for a stipulated sum.

The District Attorney made the
matter public, together with figures
showing the income of the Western
Union from the poolrooms. The matter was thus brought directly to the
directors of the company, and Senator
Chauncey M. Depew, it was reported
and not denied, threatened to resign if
the gampling end of the service was
not cut out.

Depew. Gould, Schiff and others, all
of whom are prominent in high
churches have been unmercifully held
up to ridicule and scorn by the daily
press, even the most conservative papers joining in the crusade.

(BY DIRECT WIRE TO THE TIMES)
PORTLAND, May 17.—(Exclusive

made in the personnel of the San
Francisco teim that arrived here this
morning for a week of games with
Portland. Claud Schmeer, who was
engaged as shortstop, was released by
irwin and is now at his home in this
city. Andy Anderson is being carried
as utility man, and that is sufficient.
Irwin compiains bitterly against the
decisions of Umpire Jack Huston during the Seattle series, and says if
there had been a fair-minded umpire
the Seals would have had four games,
instead of two, to their credit. He declares Huston is by far the worst umpire lie ever saw.

PORTLAND, (Or.) May 17.—The Telegram says: "It is reasonably certain that by the end of the week D. E. Dugdale of Seattle will have assumed the full management of the Portland Baseball team, although not of its financial affairs. As the way thingstand at the present time, it is understood to be the plan to have Free Elyresign as manager, following which the president will appoint Dugdale. Unless plans change it is understood that Ben Ely will retain his interest in the club and continue as president, although he hals offered to sell his holdings, should anyone be desirous to make the purchase."

wine the championanis and first money. Upton beat Carney by a score of 40 to 32 and Seymour defeated Keniston by 49 to 32.

While these scores were significant enough in themselves what followed was better in every way as showing how true-hearted sports stand together and show their worth as men. Joe Carney, who was beaten last night and was the only one of the five players in the tournament to finish outside the mency, has been sick for some time and unable to play his game. He went to pieces last night in his match with Upton after being in the lead by eleven points and was beaten by two points. He was manifestly pot himself and after the play was over for the night the four other tournament players got together at the suggestion of Henry Berry, and agreed to domain the entire purse of 1100 to Carney.

The players who contributed the 1100 purse to Mr. Carney and the positions in which they finished in the tournament are as follows:

Arthur Seymour, first: Frank Kentston, second: Walter E. Johnson, third, and Robert J. Upton, fourth.

In the Uptoh-Carney games Upton had high runs of 3, 3, 2, 2 and 2 and Carney's high runs were 4, 4, 4, 4, 2 and 2. The game was finished in seventy-nine innings.

At Morley's in the amateur tournament Miller beat Amson by a score of 35 to 37, Amson being a scratch man at 40 and falling three short of his required score. A big crowd of spectators watched the game and an equally large crowd was at Berry's place, for the science of three-cushion hilliards has a strong hold on the sports as has been evidenced by the attendance at these games. Morley's tournament will continue all of this week.
